AT OAKLEY, WE'RE BOUND BY A HIGHER CALLING.

MX 2016 GOGGLE CATALOG

We create equipment that earns the trust and respect of the world's fastest racers. This unwavering passion for performance is part of our DNA, and because we design with the goal of helping people go beyond the limits of their abilities, we create products like nothing you've ever seen or worn before. With countless championship titles won by riders wearing Oakley goggles over the past three-plus decades, we've been honored and inspired to create the best tools available to protect their eyes and enhance their vision on their path to victory.

OAKLEY

MX GOGGLE TECHNOLOGY

Three decades of MX goggle evolution have led to this turning point, a landmark of technology so revolutionary that it will render ordinary goggles obsolete. Forget any notion of what defines high performance. Not since the early days of the sport has a single design brought so much innovation. Essential gear for anyone who rides for glory, rides for sport or just rides for fun, the Oakley Airbrake™ MX and Mayhem™ Pro MX goggles created the new standard for protection, clarity, comfort and convenience.

AIRBRAKE™ MX TECHNOLOGY

ADAPTABLE CHASSIS

Airbrake™ MX is equipped with a fully adaptable and serviceable chassis, allowing you to easily swap outriggers between tear-off and roll-off configurations, replace worn out foam faceplates or switch the strap to match your style.

COMFORT + PERFORMANCE

Airbrake™ MX is composed of ultra-strong, yet lightweight, O Matter™ combined with flexible urethane. The rigid outer frame holds the lens securely without the bending that can cause visual distortion, and a soft and pliable inner faceplate conforms to your face like it was made just for you.

SWITCHLOCK® TECHNOLOGY

Airbrake™ MX is for those who adapt and conquer because it lets them switch up their vision with the convenience of Oakley Switchlock® Technology. Our unique design makes the process of lens changing fast and hassle-free so you can quickly swap lens tints to optimize visibility and comfort according to light conditions.

INTEGRATED ROLL-OFF SYSTEM

Airbrake™ MX is available with a revolutionary roll-off system that utilizes an integrated cartridge canister inside the outrigger strap attachment for the ultimate in convenience and visibility.

OPTICAL CLARITY

Airbrake™ MX and Mayhem™ Pro MX lenses are injection-molded under extreme pressure with high-impact Plutonite® to create a precise contour of optically correct geometry and clarity. Plutonite® is the most optically pure lens material ever utilized for MX goggles.

MAXIMUM PERIPHERAL VISION

Airbrake™ MX and Mayhem™ Pro MX precision lens curvature is matched with sleek frame architecture, expanding your field of vision.

HIGH-IMPACT PROTECTION

Oakley performance goggles meet and exceed ANSI Z87.1 and EN 1998 Standards for inspired rider confidence.

TRADITIONAL GOGGLE TECHNOLOGY

ANTI-FOG

All Oakley MX goggles utilize our F3 and F2 anti-fog coatings to absorb moisture and eliminate haze. Frame vents engineered to provide optimized airflow keep your eyes cool and comfortable.

FLEXIBILITY + DURABILITY

The polymers in our thermoplastic urethane goggle chassis are formulated for high durability and controlled flexibility for improved safety during impact, as well as maintaining resistance to UV radiation, humidity, thermal shock and chemical exposure. Airbrake™ MX, Mayhem™ Pro and Crowbar® models feature rigid O Matter™ outrigger strap attachments that provide further enhancements in comfort and security.

SWEAT MANAGEMENT

Ultra-plush faceplate foam utilizes triple-layer construction to wick sweat off your face. Fleece layer draws liquid away from the skin and into the dual-density foam where capillary action moves moisture to the perimeter for quick evaporation.

FIT / COMFORT

Oakley MX goggles offer the highest level of comfort and performance. Contoured frame architecture provides a continuous seal against dust and debris while eliminating pressure points and hot spots.

RYAN DUNGEY SIGNATURE SERIES

Most riders can only dream of claiming a motocross title, let alone every title they set out to win. Ryan earned them all by the time he was 24. His dominance kicked off in 2009 when he conquered the Lites Supercross Championship and the 250 AMA Motocross Title, and when he stepped up to the 450 class the next year, he became the second youngest rider in history to win the Supercross Championship and Motocross Championship in a rookie season. Ryan puts his faith in the razor-sharp clarity of Oakley goggles, and we're showing our mutual respect with two new Signature Series editions.

Airbrake™ MX and Crowbar® goggles get the Dungey treatment with strap art that flows with his logo, along with a strap wrap that carries a print of his signature. The chassis of each design gets some smooth color highlights to mark it as a predator of performance and style. Both editions are matched with our premium Dark Grey lens and a custom Microclear bag that serves as a handy lens cleaner.

ELI TOMAC SIGNATURE SERIES

When other four-year-olds were still playing in sand, Eli Tomac was ripping his up with a dirt bike. His love for riding led to eight amateur racing titles before he stepped into the arena of pro motocross in 2010 and became the first rider in history to win the first race he entered. After six podium finishes in his rookie season, he went on to dominate the 250SX West Region in 2012, capturing his first Supercross championship. We're honoring the young speed demon from Colorado with a Signature Series edition of DaKey Airbrake™ MX goggles.

The desert camo graphics salute Eli's brother, who serves in the military. Optimized with a Dark Grey lens, this collectible comes with a strap wrap that sports a print of Eli's signature, plus a custom Microclear bag for lens cleaning and goggle storage. Three name tape patches are also thrown in, including one that says "BAMF" (Yeah, that's right. Wear it proudly.)

HIGH IMPACT
FOR THE LINE IMPACT

KEN ROCZEN SIGNATURE SERIES

By the time he was a teenager, Ken Roczen had already earned a junior world championship, and it put him on a trajectory of success that continues without limits. Talent and drive took him from back-to-back masters championships in his native Germany to a World Championship in MX2, then up to the 250 class where he became the West Coast Supercross Champion in 2013. The next year saw him at the top of the podium in the 450 Pro Motocross Championship, making him one of an elite group of riders who earned the title in their rookie season.

When a racer is that skilled at his craft, he deserves a namesake goggle that salutes his style while offering all the performance he demands. Introducing the Ken Roczen Signature Series Airbrake™ MX, a design that salutes Ken's love for the California lifestyle. Oakley artists decked the strap with surfboard stripes and palm trees, and the colors keep the attitude on the edge of menacing. We put Ken's racing number on an outrigger and a custom strap wrap that proudly carries a print of his signature. This premium Oakley goggle comes with a custom Microclear bag for frame storage and lens cleaning.

ANTHONY LEE DESIGN

JAMES STEWART SIGNATURE SERIES

James Stewart didn't earn his titles by limiting his challenges. He did it by challenging his limits. The Oakley Airbrake™ MX and Mayhem™ Pro let him do it with innovative chassis designs that achieve a new standard of comfort and high-impact protection.

RYAN VILLOPOTO SIGNATURE SERIES

He's a four-time AMA World Supercross Champion and a three-time Motocross Champion, and watching his career is like seeing an epic legend unfold in real time. RV2 is following in the footsteps of Oakley icons whose stories live on through decades of MX greatness. How do you honor a rider who has carved his place in the history books? You sit him down with Oakley design gurus and the best goggles on the planet, and you pick his brain until you find the look that puts octane into attitude. Introducing the Ryan Villopoto Signature Series.

Ryan is racing in Europe this year, putting everything into his shot at becoming the first American to win all three major globally-recognized championships. That's what inspired the red, white and blue of his Signature Series goggles. We pumped up the attitude with vibrant graphics and "RV2" logos then added a strap wrap with a print of his signature. Oakley Airbrake™ MX and Oakley Crowbar® goggles are now available in these special editions.

JEFFREY HERLINGS SIGNATURE SERIES

Jeffrey Herlings is fast enough in the sand to make a desert lion jealous, and aggressive enough to make big cats cower. That's what earned him the title of MX2 World Champion in both 2012 and 2013. All that breakneck speed and sand shrapnel doesn't worry him because he has the uncompromising protection of Oakley goggle technology, not to mention optical clarity that keeps him in focus as he hunts down MX glory.

Jeffrey's "Bullet" nickname inspired the graphics for special edition goggles that come fully loaded with performance. The Signature Series Airbrake™ MX and Crowbar® are matched with 24K Iridium® lenses (plus a Clear one with Crowbar® to quickly adapt to extreme conditions). Along with a custom Microclear bag for storage and lens cleaning, both have a matching "gold bullet" strap wrap that proudly carries a print of Jeffrey's signature.

FLIGHT SERIES COLLECTION

Somewhere between a dirt melee and the dog fights of aerial warfare, MX racing is a battle of warriors who carry their colors with honor. The Oakley Flight Series is a unique collection of MX goggles inspired by fighter pilots, the aviators who deck their helmets with custom graphics in preparation for combat missions. We created special renditions with art that puts each design in its own squadron. This is how you make your mark in the aerial blitz and battle field of berms. Each goggle comes with a Flight Series strap wrap and an insignia with "Fighting 453rd" to salute the military innovations of Oakley.

TROY LEE DESIGNS® COLLECTION

The fuel of pro racers is a high octane mix of adrenaline and attitude, and they've been getting it from Troy Lee Designs® (TLD) for three decades. TLD is the premier custom paint shop for racing helmets and the MX industry leader in cutting-edge colors and graphics. We joined forces with Troy and his cadre of visionaries to create a special collection of customized creations. The driving force behind these design rarities was the idea of fusing the best of art and innovation, and putting it in the hands of those who have what it takes to rise in the ranks of riders.

O2™ MX

As an evolution of the legendary O Frame® goggle, the O2™ family has Oakley DNA pumping through every vein. The Oakley O2™ MX extends the O2™ style and performance to a mid-sized fit, but there is nothing medium about it. The large lens with streamlined frame geometry expands peripheral view in every direction.

- Flexible O Matter™ frame optimized for comfort, fit and maximized peripheral view
- Triple-layer face foam - eases to wick away sweat
- Discreet frame notches at temples to provide compatibility with most prescription eyewear, without compromising fit
- Includes scratch-resistant and impact-resistant lens with a anti-fog treatment and removable noseguard
- All Iridium® lens SKUs include extra clear lens
